Meeting Magic

With Meeting Magic, you are assured of a world class meeting management experience. Now work with certainty on meetings, participants, schedules, and equipments in use. Experience higher productivity and greater value through meetings.

No Meetings right now? Show corporate communication.

In absence of meetings, the display switches intelligently to show corporate information. Now use your idle displays to convey corporate information like important announcements, corporate movies etc. As soon as the meeting is scheduled, at the decided time, the display switches to the Meeting Magic information screen automatically. Impress your visitors and employees with take corporate communication digital.

Proven. Running at most 5 star hotels

The Meeting Magic system is already installed at leading five star hotel properties like ITC, Taj, Orchid at multiple locations in India. Meeting Magic display information on meetings and events in banquet halls. A proven, reliable 24X7 system that works every time, all the time. With more than 50 banquet halls running this system and visible to thousands of guests every day, Meeting Magic is the system of choice for most hotels, and cooperates.

Alerts and notifications

Extensive alerts and notification are now available to inform people on bookings, cancellations, rescheduling etc. These are available optionally on email, SMS, windows messaging.

Flexible Scheduling

Meeting Magic has a flexible scheduling system to take care of simple to complex scheduling needs. You can easily book meeting rooms by just requesting the administrator on email and get a confirmation. Alternatively, you can log on the self help system yourself, see the available slots and book the rooms on your own. All this, by sitting at your desk.

Bring in the Magic

You can now wow a visitor by greeting him instantly on the display, show information in regional languages, interact using touch screens, integrate with your email systems and more. Just explore the world our Magic Meetings Options available to know more.

Management

Web meeting room manager

Search meeting rooms available on parameters like room size, equipment availability etc. is optionally provided for self help meeting room manager.

Advanced, professional and enterprise versions allow you to start small, upgrade and scale up.

Ordering services

Commonly used services like catering, networks, video conferencing etc. be specified at the time of booking meetings.

Outlook/ MS exchange / Google Calendar / Lotus Notes / MS Lync

Ready to use MS Exchange Interface sends email notifications to all participants. Active Directory & outlook are seamlessly integrated. Other calendar systems are integrated too.

A simple centralized management system on Excel is designed for managed meeting rooms. In this interface, a receptionist or security personnel or administrator manages a simple excel sheet to define room bookings. This takes away the complexity of the system and makes it usable with little training to any new user. A third party interface can be customized for import of data.

Powerful reports

A range of reports is available for the administrator to see room booking information. Reports can be exported to excel, pdf etc. further.

Access rights

Predefined access rights and roles restrict users to book specific rooms. For example, only a restricted user group can book a room with video conferencing equipment whereas general rooms can be booked by anyone.

Display

Embedded System with light bar

Built on the embedded application controller platform, drawing power and network from POE, fanless designs, Meeting magic is reliable, scalable, and affordable for any rollout. Select models have a built in light bar to show the status of the meeting room. Occupied is denoted by red light and green denotes free rooms. This helps to identify the meeting rooms at a glance.

Standard Mounting and power options

Standard vesa mounts and Power over Ethernet make standard corporate deployments very easy.

Summary Screen

Summary screens placed in reception areas provide at a glance view of the meetings.

Hybrid deployments

Most combinations like touch/non touch displays and no displays at all are supported. You can start small, add displays and increase the room network as your business grows.

Touch Screen Interactivity for search, end, extend meetings

The system comes with an option of spot bookings using a touch screen interface right at the meeting room location. Used for ad-hoc bookings, this is a useful feature to extend the meeting timings, cancel a meeting or book a meeting quickly. A facility to search for vacant meeting rooms is provided too. Issues noticed in the meeting room can be notified to the service departments by an email.

Display corporate information when rooms are free

Meeting Magic room schedulers now integrates with signage, showing basic signage content when the room is free. For smaller screens, ability to show full screen images is provided for select models.

Foreign language integration

Foreign language integration is done for most languages simply by integration of fonts. Confidential meetings can be hidden from the display to just show "meeting in progress" without any other details.

Non interactive Mode

Select meeting rooms like board rooms can be fitted with non interactive displays. Such rooms are booked by executive offices and are not for spot bookings or scheduling. A time bar is shown optionally for the day's schedule.
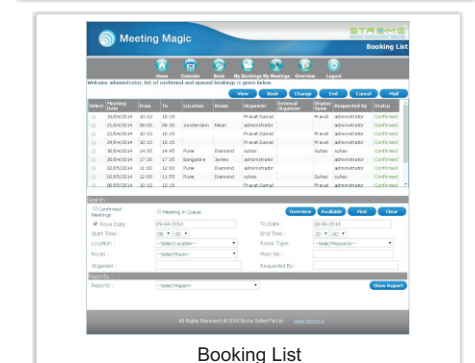

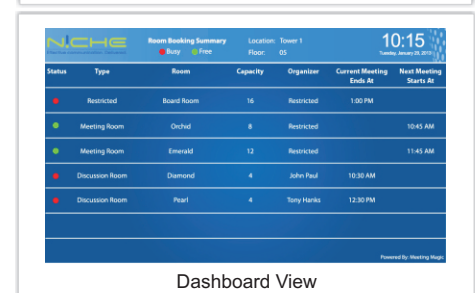

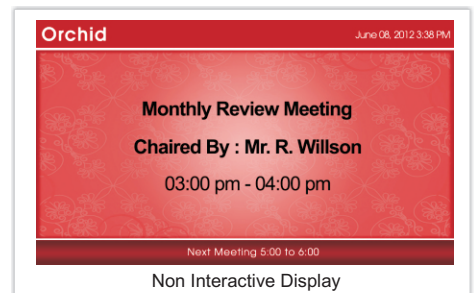

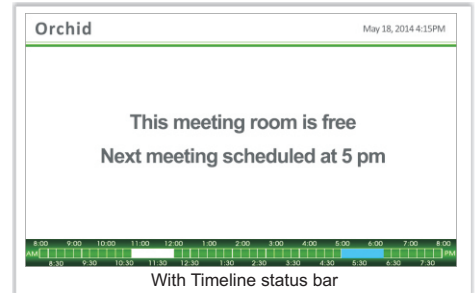

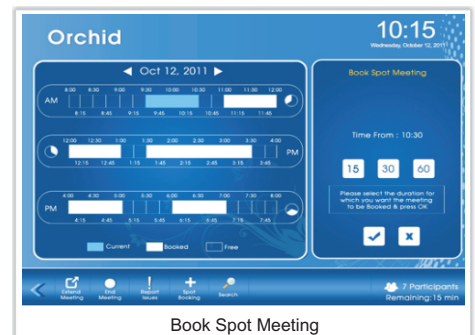

Bundling

Specific bundles are offered to partners for quick ordering of displays with embedded software. Please refer to the datasheets for specific model numbers and a selection guide.

Reliable, Scalable and Flexible

Meeting magic can be extended to tens or hundreds of displays. Working on standard TCP-IP protocols on LAN networks using embedded hardware and operating systems, Meeting Magic brings a new level of reliability to the solution.

Book Spot Meeting

With Timeline status bar

Non Interactive Display

Only signage when no meetings are scheduled
