

Solutions that work for your business

Maximise investments

Centralised Management

Over 150 solutions for 20 business verticals

More than 3000 deployed internationally.

Driving key messages across with centralized control, Streme offers unlimited options to build solutions to enhance the experience with effective communication & interaction.

Enhancing the customer experience

With Streme, you can build and deliver world class experience to your customers. Today, interactivity and driving the key message being the need of the hour, Streme provides you the platform to deliver the same.

Interactive Audio Visual Tools

Instead of just simple broadcast signages that are in a looping mode, you can integrate devices like simple TV remote controls to build interactivity. With interactivity, you take the customer recall and engagement to the next level. On large screens as opposed to smaller kiosk screens, you deliver audio visual messages powerfully to build the customer experience.

Environment Friendly

Streme supports the Go green revolution. With digital displays, you avoid unnecessary papers, printing and transportation, resulting in saving trees and reducing pollution. Streme supports embedded technology for lower power consumption, thereby supporting the environment further.

End to end solutions.

We work very closely with most national and regional system integrators. Our solutions approach guarantees a working design of the entire solution. We are open to working with your existing SI partners. Taking end to end responsibility of delivery, you can now rest assured of a perfectly rolled out project. We even provide services like creative adaptation and network management to our customers.

Proven Framework

Streme works on a 150 component framework. Streme powers thousands of screens across the nation including leading banks. With focus on embedded systems, we bring unmatched reliability, security and scalability to the network. You can setup a centrally controlled, future proof, expandable, secure network.

The Streme framework consists of player hardware, embedded OS and Streme's embedded player software. Streme player software is benchmarked and proven with leading hardware providers, featuring the latest technology to deliver truly outstanding dual-core performance computing power, great battery life as well as, low power, with multiple OS support and longer life cycle commitment.

Healthcare Solutions

Transforming Customer Experience.

Streme - OPD Display

Integrated with the Hospital Information management system and the Niche patient management system, the display shows current and future tokens. This is managed through a web based system used by Doctors, Nurses and admin staff.

Streme – In Patients Dept Display

Names of Patients and doctors managing these patients are displayed outside each room.

This electronic display is updated when patients are admitted, discharged or transferred.

Streme – ICU Emergency Display

Integrated with an automated voice calling system for patients, this system alerts a relative as soon as attention is needed.
